

Brendan McKinnis

Experience

Technical and Career Education Instructor

Frank Phillips College, Borger, Texas

Aug. 23, 2017 – Present

Part time Instructor helping fill any needed position in the electrical and instrumentation field. Responsibilities include acquisition of all needed instructional materials and presenting these materials in the classes. Responsible for entering all grades and attendance tracking into the computerized portal.

Field Supervisor-Leak Repair

Guardian Compliance/SealTech , Borger, Texas

July 17, 2013 – Present

Initially began as a Leak Detection and Repair (LDAR) Monitoring Technician assigned to the Phillips 66 site under Guardian. After six months was successfully promoted to the role of Field Supervisor performing repairs on leaks covered under the EPA regulated components. Employment required working in conjunction with the Phillips 66 Refinery on Delay of Repair (DOR) components. This resulted in a reduction of the refinery's DOR list by 50% through performing activities including simple maintenance and up to and including drill and tapping components on live units.

Monitoring Field Supervisor

TEAM Industrial Inc., Borger, Texas

Nov. 17, 2009 – June 30, 2013

Initial employment with TEAM Industrial as a Monitoring Technician and was quickly promoted to Field Supervisor over the Leak Detection and Repair (LDAR) crew at the Phillips 66

Refinery prior to Guardian assuming the contract. Remained with TEAM and assumed responsibility over the monitoring for the companies traveling sites (5). New responsibilities included performing maintenance while not traveling (i.e. hot taps, clamps, etc.) Additional responsibilities assigned included creating the schedule of when the monitoring would be performed, ensure all documentation was properly executed and filed in compliance with state and federal regulations.

Education

Associates of Applied Science – May 2017

Frank Phillips College, Borger, Texas

AAS – Instrumentation and Electrical
